

# Impression Series® R.O.

Innovative Water Filtering at the Molecular Level

## Effectively Used to Reduce

- Nitrates
- Lead
- Arsenic (pentavalent)
- Cyst (cryptosporidium)
- Fluoride
- Radium 226/228
- and more\*

Impression® R.O.  
SERIES

The Impression Series® Reverse Osmosis Drinking Water System reduces harmful contaminants\* and turns common tap water into the fresh, quality water that nature intended us to drink. A four-stage system filters water at the molecular level. Drawn water passes through a final carbon filter to remove any unwanted tastes or odors. The result is simply healthier, better tasting water.

- Healthy, sparkling clear drinking water
- Pristine, flavorful coffee, tea and juice
- Clearer ice cubes
- Better tasting soups, sauces and meals when prepared with R.O. water
- Environmentally sound water treatment
- Cost effective — the daily cost of bottled water will no longer be a concern
- Convenient — fresh, clean water ready at your tap

Innovative Water Filtering at the Molecular Level

## Protect Your Drinking Water

The Impression Series® reverse osmosis drinking water system offers a convenient, affordable, environmentally sound alternative to bottled water. This system is designed to filter water at the molecular level to reduce contaminants\*, remove odors and improve the appearance and taste of your tap water. Your authorized Water-Right dealer can help you determine the best R.O. system for your household so you can enjoy the pure taste of bottled water, right at the tap.

### Advanced Features:

#### Pre-Filter

- Captures large particles, such as silt, rust or scale
- Extends the life of the R.O. membrane
- Contains activated carbon that reduces chlorine particles that can harm the system's membrane

#### Membrane

- Traps and removes particles too small for the prefilter to catch
- Microscopic pores allow hydrogen and oxygen (H<sub>2</sub>O – water) molecules to pass through
- Flushes dissolved solids and other contaminants out of the system

#### Final Polishing

- Final filtering prior to reaching the tap
- Two carbon filters remove any remaining tastes and odors
- Imparts the final "polish" to your water

#### Holding Tank

- Stores approximately two gallons of fresh, clean water
- Automatic shut-off maintains fresh supply

\*The Impression Series® T.F.C.-4 R.O. Drinking Water System is Tested and Certified by NSF International against NSF/ANSI Standard 58 for the reduction of:

- |                          |                         |
|--------------------------|-------------------------|
| • lead                   | • selenium              |
| • arsenic (pentavalent)  | • cadmium               |
| • copper                 | • fluoride              |
| • nitrates               | • TDS                   |
| • nitrites               | • radium 226/228        |
| • cyst (cryptosporidium) | • chromium (hexavalent) |
| • barium                 | • chromium (trivalent)  |

\*See the Performance Data Sheet for specific percentages of contaminant reduction.
