Water Filtration Simplified™

The unique ONE™ cartridge tank filter system, designed to replace smaller, commonly used cartridge filters, is the ideal solution for the removal of a multitude of particulates. The ONE system can utilize a variety of large capacity cartridges which greatly extends replacement frequency. Enjoy clean, crystal clear water from our revolutionary ONE system that is easy to use and virtually maintenance-free.

System Features:

- Cartridges specially designed for higher flow rates and higher contaminant retention capacities
- Wide variety of application-specific cartridges available
- Easy access to cartridge for service and replacement purposes — no special tools required
- Optional bottom drain — allows particles to flush from the system and extends cartridge life
- Simplified installation — inlet and outlet at the top of the tank

*Effectively Filters
Water in Residential
Applications*

- Primary whole house filtration
- Polishing filter
- Taste and odor removal
- Particulate removal
- Greatly extends the life between cartridge changes
- Easy, replaceable cartridge design

Cartridge changes can be achieved quickly by removing the top cap assembly for easy access to the cartridge. Simply lift out, dispose, and place a new cartridge filter in place and replace the top cap.

ONE™ Filtration

Residential EF-835-1

The EF-835-1 Cartridge Tank comes equipped with a top mount valve including bypass and is available in multiple cartridge types. These filters offer excellent filtration and, because of their size, outstanding retention capabilities for residential and light commercial applications.

Carbon Block Filters (Blue Series)

This filter type offers the benefit of carbon block filtration for the removal of particulates and taste and odor issues, with exceptional flow rates up to 28 gpm at 3 PSI pressure drop.

CT-03-CB-IO: 3 micron carbon block

CT-20-CB-IO: 20 micron carbon block

CT-03-CB-AMINE-IO: 3 micron carbon block chloramine reduction

Double Pleated Depth Filters (Orange Series)

This filter type offers depth filtration down to 5 micron, while the double pleated layer design allows for flow rates up to 30 gpm at a 3 PSI pressure drop.

CT-1005-IO: 10 micron outer filter x 5 micron inner filter

CT-2010-IO: 20 micron outer filter x 10 micron inner filter

CT-5020-IO: 50 micron outer filter x 20 micron inner filter

(Green Series)

CT-20Nano-AG-IO: 20XNANOAL™ with AG double pleated cartridge

String Wound/Meltblown Depth Filters (Yellow Series)

This filter type offers depth filtration down to 5 micron in a standard string wound configuration with a "meltblown" core and allows for 24 gpm at 3 PSI pressure drop.

CT-2005-SWMB-IO: 20 micron string wound x 5 micron core

CT-5020-SWMB-IO: 50 micron string wound x 20 micron core

Your local water treatment professional:

The time between changes is enhanced due to the size and capacity of the ONE filter to remove dirt and contaminants from your water.

The exclusive 'stand off' leg feature at the bottom of each cartridge allows debris to clear from the filter and clear from the tank through the bottom drain.

Flow rates are based on each specific application, micron rating, solids content and a number of other factors. User should consider these factors when selecting the tank and cartridge filter for their particular requirements.
