Whether you have hard municipal water or extremely hard well water, Impression Series® water softeners deliver the clear, soft water you want and need. Its easy-to-read LED screen and user-friendly console allows you to monitor all operating functions. It’s true — nothing will last longer than your first Impression.

**System Features:**
- Solid-state microprocessor control
- Meter monitors and self-adjusts regeneration cycles based on household trend of water use
- Easily programmed for optimum performance
- Extended lithium battery backup
- Flexible “adjustable cycle sequence” programming — saves salt and water
- Advanced history and diagnostic screens

**Benefits:**
- Soft Water For Your Entire Home
  - Removes hardness
  - Softens household water using minimal salt and water
  - Soft water prevents mineral buildup and keeps your appliances running smoothly

**Soft Water For You and Your Household**

---

Impression Series® Softener

Soft water for you and your household

SOFTENERS
**The Meter**
Water usage is electronically monitored and the system is automatically regenerated based on actual water consumption. The controller can anticipate higher water usage based on previous trends and regenerate the system, as needed, to ensure the availability of quality water. Likewise, when water usage is low, the system regenerates less often, saving on salt and water.

**The Electronics**
The microprocessor captures all water softener operations, including gallons per day, total gallons, peak flow rates, and total regenerations. Time and history is held in memory and protected by a built-in battery backup.

**The Control Valve**
A rugged, Noryl™ control valve handles high flow rates without dropping household water pressures — like when showers, toilets and faucets are all in use at the same time.

---

**Soft, Quality Water**
Impression Series® water softeners provide the quality water you need for everyday life. Day and night, your water will now perform the way it should — creating richer lathers by using less soap, rinsing cleaner without film and residue. Your household plumbing will be protected from staining, scale and mineral deposits. Best of all, this system is built to last and easy to operate.

**Cabinet Design**
The optional Impression cabinet (IMC) offers excellent space savings while still allowing up to 150 lbs salt storage. Its top sliding cover opens to a large tapered chute for ease of adding salt to the system without removing the cover.

This new design offers a unique flip up access window that allows you to program the valve without removing the cover. A new brine valve/brine well system allows full access to the safety float valve for servicing, without having to disassemble the complete system.
