

Product Update

Due to adjustments made to tooling, changes have been made to the **CV3149 1" NPT Male Elbow**. This part is featured in fitting assembly CV3007 and is available on every Water-Right Group valve.

We have outlined the specific improvements made to this part below.

Key Features of the Part Change:

1. The material has been adjusted from PVC to Glass Filled Polypropylene (GFPP).
2. The upgrade offers better compatibility in warmer environments and better chemical compatibility.
3. Color Change. Due to the adjustment in material composition, the color of the elbow will now appear as black instead of grey.

Old Elbow

New Elbow

This is a running update, which means these upgraded elbows will be integrated into production as the inventory of the current stock depletes. Outside of the changes listed above, the updated elbow is structurally identical to its predecessor and is directly interchangeable with older parts.

For any questions regarding this updated part, call technical or customer service at (800)-777-1426 or contact your regional sales manager. Additional contact information is provided at the bottom of this bulletin.

Thank you.
