

Product Update

August 28, 2018

Dear Water-Right Customer,

We write you today regarding an update on our coconut shell carbon medias. We will be making a rolling transition from the Calgon brand to the Jacobi brand coconut shell carbon. We will continue to send the Calgon brand with your orders until inventory is depleted but you may begin seeing the new bags as early as next week.

What's Changing:

Jacobi offers two types of coconut shell carbons under their "AquaSorb" name. The AquaSorb CS (black bag) is the regular coconut shell carbon that will replace BOTH the regular coconut shell carbon and the Prop 65 coconut carbon used in the state of California. This carbon is used in many of our resin/carbon systems and our backwashing filters. The other product called AquaSorb CX or catalytic (Orange/White bag) will be replacing our current Calgon Catalytic Carbon. This carbon is used in specialty applications. We will continue to use the normal Calgon "Centaur" Carbon in our air systems, this switch will not affect those products lines.

| CURRENT PART NO. | REPLACEMENT |
|------------------|-----------------|
| 249203207 | AquaSorb CS |
| 21493207 | AquaSorb CS |
| CA8056-C | AquaSorb CX-MCA |

Both AquaSorb carbon medias are NSF certified and meet the Prop 65 requirements.

If you have any questions regarding this transition, please call our Customer Service department at (800) 777-1426.

Sincerely,

Your Water-Right Group Team
