

Product Update

This is a brief update to inform you that there have been changes made to the **CV3158-03 Male Drain Elbow**.

New tooling has been made for this part, with the primary changes being:

- The removal of the side port, formerly used for the drain silencer.
- The material changing to Glass Filled Polypropylene, offering better chemical resistance and compatibility in warmer environments.

This elbow is also available in different configurations that are affected by this update:

- **CV3158-02:** 3/4" male drain elbow with "o" ring
- **CV3158-03:** 3/4" male drain elbow without "o" ring
- **CV3158-04:** 3/4" male drain elbow used with a reducer on 2" Clack-style valves when needed.

Note: The 3/4" male drain-line elbow with silencer (**CV3158-01**) is discontinued and will not be affected by this update. It is still available to order as a replacement part.

Male Drain Elbow Update Images

Current Drain Elbow

New Drain Elbow

This is a running update, which means these upgraded elbows will be integrated into production as the inventory of the current stock depletes.

For any questions regarding this updated part, call technical or customer service at (800)-777-1426 or contact your regional sales manager. Additional contact information is provided at the bottom of this bulletin.

Thank you.
