

PC Board Update

9/28/2020

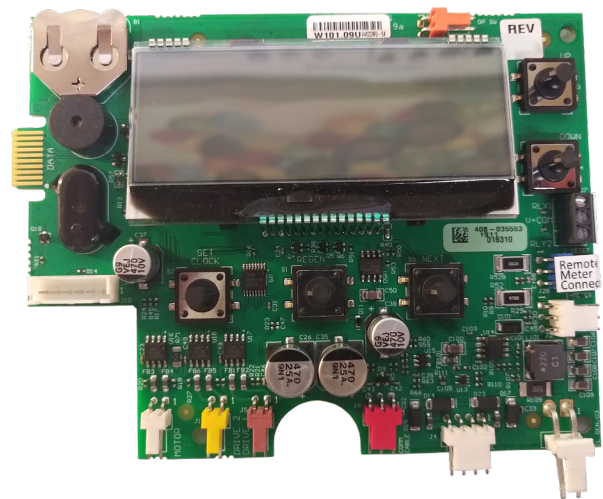

An update to LCD-backlit PC boards

Our PC board manufacturer has informed us that a slight adjustment has been made to backlit LCD PC boards across all brands. This update removes the white border surrounding the LCD screen (pictured below) and is strictly an aesthetic change; functionality and programming of the board is not affected in any way.

The images below are for demonstration purposes only. They may not be indicative of the version, type, or layout of boards that you may be familiar with. This update will be made across all of the brands and models in the Water-Right Group.

Current board with white LED screen borders

Updated board with borderless screen

This is a rolling update. Adjusted boards will enter the field once the current inventory is depleted. As a result, some brands may see boards introduced before others.

For questions or concerns regarding this update, please call Water-Right technical or customer service at (800) 777-1426 or contact your Regional Sales Manager.

Thank you!
